'Deep Helder' ready for operations in July

Posted on Jun 6th, 2014 with tags deep helder, DeepOcean, Delivery, for, July, News, Scheduled .

The new-build Subsea Support vessel Deep Helder, recently chartered by DeepOcean, continued its trials this week from the port of Delfzijl in the Netherlands.

The 65 m long DP2 class vessel will be ready for operations in July. It is designed for low fuel consumption, clean ship/green passport/SPS2008 and high comfort class notation.

The vessel will be equipped with an offshore crane, Survey and ROV systems and 3 moonpools. A total of 50 personnel can be accommodated on the vessel.

Deep Helder is being built by De Hoop Lobith at the Foxhol Yard, Groningen in the Netherlands.

The ship management and marine crewing shall be undertaken by Seamar Subsea B.V and the vessel will sail under Dutch Flag.

"Deep Helder" is a cost effective vessel that we plan to operate on Survey (Geophysics, Inspection & Geotechnical) , IMR and light weight Trenching, Excavation and Mattress Installation projects for our customers in renewable and the oil & gas markets," **Rick Green**, DeepOcean's General Manager of DeepOcean B.V. said.
