SHIP REPAIR & SHIPBUILDING

HOOP Ad Int Cruise and Ferry review def.indd 1

One-stop shop for building, maintenance and repair

As a result of the substantial growth of the cruise market in Europe over the past few years, there is an increasing demand for high-quality vessel maintenance in the winter. That's why renowned Dutch shipbuilder Shipyards De Hoop recently expanded its activities to include the servicing, maintenance and repair of river cruise vessels and day-passenger vessels. Based in a converted pontoon in the old customs harbor, right next to our yard, we carry out all necessary repair and maintenance activities on your vessels quickly and flexibly. Our Ship Repair team can even come to you, and carry out repair and maintenance work wherever your vessel is moored.

Building and designing sea-going and inland vessels

Shipyards De Hoop is a successful Dutch builder and designer of custom-built vessels. Designing and building a completely new vessel requires a creative and innovative approach, as well as good knowledge of the latest developments and opportunities in the industry. This is how Shipyards De Hoop differentiates itself within the market: every vessel, sea-going or inland, is a one-off. Because we have all the necessary disciplines for building a brand-new vessel in-house and under one roof, our yard can deliver your new vessel fast, while you can be sure of a high level of flexibility and quality at all times.
