

CUSTOM-BUILT SEA-GOING VESSELS & INLAND VESSELS

Shipyards De Hoop is a successful Dutch builder and designer of custom-built vessels. Designing and building a complete new vessel requires a creative and innovative approach. As well as a good knowledge of the latest developments and opportunities. This is how Shipyards De Hoop differentiates itself within the market: every vessel, sea-going or inland, is a one-off! Because Shipyards De Hoop has all the necessary disciplines to build a complete new vessel under one roof (inclusive in-house department of engineering), the yard is able to deliver within fast lead times and a high level of flexibility and quality.

One-stop repair facilities

Shipyards De Hoop made a bold move earlier this year to expand its business with the introduction of De Hoop Shiprepair. As part of a move to expand from shipbuilding into a 'one-stop shop' for all the key shipbuilding disciplines, the yard took advantage of a major overhaul of the facilities at the Lobith shipyard to introduce a repair division. This has enabled the yard to take advantage of an increase in demand for repair services as the cruise market in Europe continues to grow. The new division, which caters to customers at both the Lobith and Foxhol yards, provides a comprehensive range of service and repair facilities for river cruise vessels as well as day passenger vessels.
