125 years of Experience

Shipyards De Hoop was founded in 1889 and has developed into one of the most established yards of the Dutch shipbuilding industry. At De Hoop, the focus is on designing, engineering and building custom vessels, for both the inland and seagoing markets. Using a characteristic down to earth approach, the yard provides all Dutch built craft for niche markets.

Full life cycle support

Shipyards De Hoop aims to deliver a complete package of products and services to support ship owners throughout the lifetime of their vessel. The package includes:

Customer Finance

De Hoop has created a separate entity composed of shipping and finance experts providing specialist advisory services in: Regulatory & subsidy issues, financial engineering and other financing solutions.

Design studies

Besides engineering for our own production, the yard also offers design and engineering services to third parties.

Turnkey Shipbuilding

De Hoop offers a wide range of vessels and does not limit itself to one particular type. Each design is unique and built with a goal-based approach to the client's needs and wishes.

Designing & building interiors

De Hoop has all the necessary expertise and disciplines to design and build a complete new interior under one roof.

Shiprepair, Maintenance & Conversions

Shipyards De Hoop aims to be a one-stop-shop for their clients. De Hoop Shiprepair is part of this. By offering preventative long-term maintenance programs at various service levels, it is possible to plan ahead and therefore keep the life-cycle cost of the ship low, whilst maintaining its good condition.

De Hoop facilities

Shipyards De Hoop has two shipbuilding facilities, one in the Dutch province of Gelderland (De Hoop Lobith) and the other in the province of Groningen (De Hoop Foxhol). At both sites all the required core disciplines are in-house. To support both facilities there is an outfit quay in the Rotterdam harbour area.

Company values

De Hoop staff is committed to a customer-oriented ethic in which craftsmanship, quality, creativity, innovation and flexibility towards the client are paramount. The shipyards pride themselves on embracing the latest technology, constantly investing in new facilities, evolving services and expanding their expertise. Each product is unique and built with a goal-based approach.
